Contact Tel	02078610948
Contact Email	james.wadsworth@bentley.com

System Details

System Name	Bentley UKPMS
System Version	v4.5.5.0
System Release Date	January 2017

Test Overview

Date Submitted

Full accreditation	10 th April 2017
--------------------	-----------------------------

Notes:

1. If a local weighting set is imported into the system then a link file is required to associate the weighting set with the appropriate rule set. However, if a local weighting set is created within the system by copying an existing weighting set then a link file is not required.
2. The treatment reports used to provide depreciation information for footways, cycletracks and paved verges show multiple treatments under both of the individual generic treatment headings. E.g. Surface Improvement plus Localised Treatment will contribute to the Surface Improvement total and to the Localised Treatment total.
3. Section labels and inspectors' initials are automatically changed to upper case when imported.
4. Bentley UKPMS does not store or export Operator or Machine Code fields for Scanner surveys.

Certificate Dated: 14/06/17

Certificate Version: 1.00

UKPMS AHC 2016_Certificate_Bentley_v4550_v1.00.docx

5. Each Bentley UKPMS system is uniquely identified by the version number + build number + fix number. This information can be found via the Audit table. The system used for the 2016 AHC had version number v4.5.5.0, build number 01 and fix number 2 (i.e. it was based on update script log_ukp_4550_fix2.sql).

Bentley UKPMS is not able to import network data in HMDIF format. If you intend to load any network data please contact Bentley for more information with a copy to the [UKPMS Accreditors](#)
